LIST OF ATTACHMENTS

The following documents are excerpts from the Permittee's RCRA permit application. The listed documents are hereby incorporated, in their entirety, by reference into this permit. These incorporated Attachments are enforceable conditions of this permit as modified by the specific permit conditions.

Attachment 1: Facility Description.

Attachment 2: Waste Analysis Plan.

Attachment 3: Sampling, Analytical, and QA/QC Procedures.

Attachment 4: Security Procedures.

Attachment 5: Inspection Plan.

Attachment 6: Instrument Maintenance and Calibration Plan.

Attachment 7: Training Plan.

Attachment 8: Preparedness and Prevention Plan.

Attachment 9: Contingency Plan.

Attachment 10: Closure Plan.

Attachment 11: General Facility Drawings.

Attachment 12: Containers.

Attachment 13: Tank System Specifications.

Attachment 14: Subpart X Miscellaneous Units.

Attachment 15: Brine Reduction Area Miscellaneous Treatment Unit.

Attachment 16: Tank Systems.

Attachment 17: Attachment left intentionally blank.

Attachment 18: USACAMDS Site Monitoring Plan.

LIST OF ATTACHMENTS (Continued)

Attachment 19: Instrumentation and Waste Feed Cut-Off Tables for Liquid Incinerator No. 1 and No. 2, Metal Parts Furnace, Deactivation Furnace, and Dunnage Incinerator.

Attachment 20: Continuous Emission Monitoring System Plans.

Attachment 21: Attachment left intentionally blank.

Attachment 22: Agent Monitoring Plan (GB Rocket, Tons and MC-1 Bombs).

DEFINITIONS

For purposes of this permit, the following definitions shall apply:

- a. "Administrator" shall mean the U.S. Environmental Protection Agency, Region VIII, Regional Administrator.
- b. "Agent Free" shall mean the non detection of any chemical agent while monitoring with an Automatic Continuous Air Monitoring System.
- c. "Committee" shall mean the Utah Solid and Hazardous Waste Committee.
- d. "Facility" shall mean all contiguous land, and structures, and other appurtenances, and improvements on the land at the Deseret Chemical Depot facility. This facility description is set forth in Attachment 1.
- e. "GB" shall mean the nerve agent Sarin with the chemical name of Isopropylmethylphosphonofluoridate.
- f. "H" shall mean blister agent mustard prepared through the Levinstein process with the chemical name of Bis(2-chloroethyl) sulfide or 2,2'-dichlorodiethyl sulfide - sulfur mustard.
- g. "HD" shall mean blister agent mustard that has been purified by washing and vacuum distillation.
- h. "HT" shall mean blister agent mustard that is a 60:40 mixture of HD and T (bis[2(2-chloroethylthio)ethyl] ether).
- i. "HSWA" shall mean the Hazardous and Solid Waste Amendment of 1984.
- j. "Hazardous Waste Constituent" shall mean any constituent identified in R315-50-10, or any constituent identified in Appendix IX of 40 CFR Part 264.
- k. "Hazardous Waste" shall mean a solid waste, or combination of solid wastes, which because of its quantity, concentration, or physical, chemical, or infectious characteristics may cause, or significantly contribute to, an increase in mortality or an increase in serious irreversible, or incapacitating reversible, illness; or pose a substantial present or potential hazard to human health or the environment when improperly treated, stored, transported, or disposed of, or otherwise managed. The term hazardous waste includes hazardous constituents defined above.

DEFINITIONS (Continued)

- l. "RCRA" shall mean the Resource Conservation and Recovery Act of 1976, as amended by HSWA in 1984.
- m. "Release" shall mean any spilling, leaking, pouring, emitting, emptying, discharging, infecting, pumping, escaping, leaching, dumping, or disposing of hazardous wastes (including hazardous constituents) into the environment (including the abandonment or discarding of barrels, containers, and other closed receptacles containing hazardous wastes or hazardous waste constituents).
- n. "Significance Level" shall mean the observed level of contamination that has been determined to be allowed to remain. While the concentration of a significance level is above background concentrations, the observed level must be below applicable maximum contaminant limits established under the federal Safe Drinking Water Act, water classification standards, or below applicable air quality standards.
- o. "Solid Waste Management Unit" (SWMU) shall mean any discernible unit at which solid wastes have been placed at any time, irrespective of whether the unit was intended for the management of solid or hazardous waste. Such units include any area at a facility at which solid wastes have been routinely and systematically released.
- p. "Staged shutdown" shall mean an "operator initiated shutdown to idle".
- q. "On - Site Container (ONC)" shall mean the vapor-tight overpack container in which all munitions, with the exception of the spray tanks and the MK116 bombs which are currently stored in a different overpack-transport container, will be transported from the stockpile storage area to the Tooele Chemical Agent Disposal Facility (TOCDF) and stored prior to processing.
- r. "VX" shall mean the nerve agent with the chemical name O-ethyl S- (2-diisopropylaminoethyl) methylphosphonothiolate.

Acronyms and abbreviations used in this permit shall be defined as designated in Appendix C of this permit.

All definitions contained in R315-1, R315-2, R315-3, R315-8, and R315-9 are hereby incorporated, in their entirety, by reference into this permit, except that any of the definitions used above shall supersede any definition of the same term given in R315.

Where terms are not defined in the regulations or the permit, the meaning associated with such terms shall be defined by a standard dictionary reference or the generally accepted scientific or industrial meaning of the term.
